

## Instruction

The College of Mechanical Science & Engineering of Jilin University is a merger of the former Department of Mechanical Engineering, Department of Engineering Machinery and Department of Engineering Mechanics. The Department of Mechanical Engineering was founded in 1955, which was composed of the related department of SHANGHAI Jiao Tong University, HuaDong institute of technology and ShanDong institute of technology. After undertaking great combinations and interactions with the related department of ChangChun University of Science and Technology, Jilin University and Changchun Institute of Posts and Telecommunications, it was finally founded in 2000. The College of MSE owns two first-level disciplines. One is Mechanical Engineering, and the other is Mechanics. They **are both** the key disciplines of “211 Project”, “985 Project”. Mechanical Engineering is a national key discipline. It covers Machinery Manufacturing & Automation, Mechanical & Electronic Engineering, and Machine Design & Theory. They are second-level national key disciplines. Our college attaches great importance to the planning and development of mechanical and informational technology, microelectronic technology and biomedical technology. We have Unique Features and a high academic reputation in the fields of mechanical system dynamics and machining precision, smart precision manufacturing, modern design theory and method, structural vibration analysis and control, fluid transmission and automatic transmissional technology, micro mechanical and piezoelectric driving technology, engineering robotics, equipment reliability technology. During the Ninth Five-Year Plan and the Tenth Five-Year Plan, Our college completed a number of projects **which** belong to national natural science foundation of China, national science and technology research, national "863" project, ministries and provincial scientific research project. **With our great endeavor in these projects** we have gained many national and provincial awards, science and technology progress prizes. **Now** lots of projects are being used in production and have created remarkable economical and social benefits.

The establishment of the new Jilin university creates a good opportunity for the development of the college of mechanical science and engineering. As our country vigorously strengthens the construction of basic needs and further implementation of the strategy of developing our country by relying on science and education, the teaching and research of our college will raise to a new level. In order to strengthen the professional construction, improve and optimize the structure of teaching staff, enhance the staying power of discipline development,**and** promote the development of college, we are in bad need of workmates with lofty ideals to our faculty engaging in teaching and research work, displaying their talents and making contributions.

Recruit talent level:

1. 1000 Talent Program
2. The Chang Jiang Scholar Program
3. Tang Aoqing Program

4. Academic backbone Program

5. Young backbone Program

Please feel no hesitate to contact us about the details of the remuneration being offered if you are interested in the position.
